HISTORY OF POLAND

(AN ANALYTICAL SUMMARY)

BY

W. R.

Edited by
The Polish Information Centre M. E.
İSTANBUL

First Published July 1943.

It is impossible to understand the contemporary international situation, strifes and conflicts, as well as the actual tendencies of Polish policy, without some knowledge of their historical antecedents and justification.

Whatever may be said, it is an evident truth, proved by ten centuries in European history :

Poland, independent and strong, has been, is, and will always be the keystone of European equilibrium, and, for that reason, of the World.

Short sighted statesmen, unable to understand this working, under the influence of contradictory and passing constellations, would prepare, for their own nations, as well as for the whole world. a future full of anxieties, dangers and worse catastrophes.
